

CONTAINER SUITABLE FOR USE IN TRANSPORTATION OF ROLLS
ABSTRACT OF THE DISCLOSURE

A container for containing a long article wound on a bobbin
5 into a roll and having both widthwise ends includes a container
body having at least one end formed with an opening, a cover
closing the opening of the container body, a sealing member
sealing a gap between the container body and the cover, an stem
fixed to either the container body or the cover so that the bobbin
10 is mounted on the stem, a bobbin fixing unit for fixing the bobbin,
and a holding unit for holding the article wound on the bobbin
so as to prevent the article from being detached from the bobbin
by pressing both widthwise ends of the article wound on the
bobbin.
